

# Introducing Trilon II™

Advancing the promise of protection

Trilon II is the new hallmark for protection utilized in these better grade Wilbert vaults:

The Wilbert Bronze®

The Triune® Line

The Venetian® Line

- High-impact protection
- Moisture resistance
- Extended durability

## Trilon II™ – 3 key enhancements over standard plastic liners

In keeping with our commitment to create innovative new products that help funeral professionals better serve families, Wilbert Funeral Services, Inc. has developed Trilon II™ – a new plastic material specifically designed to enhance and extend the protective properties of burial vaults.

Featuring excellent durability and moisture protection, Trilon II high-impact plastic is now the liner material of choice for Wilbert's better grade burial vaults, including:

- Venetian® / White Venetian®
- Cameo Rose Triune®
- Copper Triune®
- The Wilbert Bronze®
- Stainless Steel Triune®
- Veteran Triune®
- Bronze Triune®

Trilon II replaces acrylonitrile butadiene styrene (ABS) plastic, first introduced by Wilbert in 1981. It's yet another advance in our efforts to help you extend to families the promise of protection.
