

To our trusted cemetery partners,

Wilbert has had a special relationship with the cemetery since our founding in 1880. Since then there has been considerable evolution in products and services as well as disposition preferences expressed by families. Currently we are both facing the challenges cremation is bringing us, and there is no doubt the trend will continue to grow.

Cremation and Burial Projections

	2014	2015	2020	2030
Cremation	46.7%	48.2%	55.8%	70.6%
Burial	47.3%	45.8%	38.1%	23.2%

*NFDA 2014 Cremation and Burial Report.
National Funeral Director Association, Brookfield, WI*

Just because cremation has been chosen as the means of final disposition, it doesn't change the families' need for a dignified and honorable final resting place. The challenge we now both face is how we can work together and serve the cremation families in your community.

Wilbert can help you with cost-effective solutions with high-quality columbarium projects. From small single units to complete garden design, we can assist with everything needed to provide turnkey projects. We can do the installation of the units, walks and benches to create a special place to honor loved ones. We also can provide the engraving, placement services and sealing to be your complete provider.

Why not explore what some options might be? Let us help you create heritage in your property and develop a solution for the cremation families who need your services.
